

**Kennel assembly comprises couplings with facility for inserting diagonal rod, at roof side**

FORMOSA SAINT JOSE CORP 1999.10.15 1999JP-293237

(2001.04.24) A01K 1/02

**Novelty:** The kennel comprises a cover which encloses all the four sides of the housing. The bottom frame work which includes horizontal rods (24) which are connected with the lateral rods (25). The bottom and upper couplings (21,22) are respectively provided in the roof and floor ends of housing, for assembling horizontal rods to a vertical prop. The roof side coupling includes the opening for insertion of diagonal rod.

**Use:** E.g. kennel assembly.

**Advantage:** Provision of coupling, with facility for inserting diagonal rod, ensures easy assembly and dismentling and enhances the appearance of the house.

**Description of Drawing(s):** The figure shows the isometric view of frame work structure.

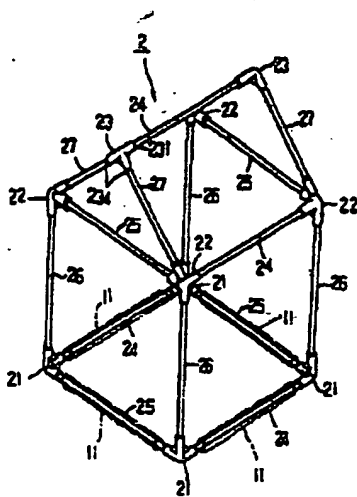

Couplings 21,22

Horizontal rod 24

Lateral rod 25
